EDUCATION

CUNY Hunter College New York, NY | Graduated Jan 2025
Bachelor of Arts: **Computer Science** *Minor:* **Applied Mathematics**

- ***Affiliations***: CUNY Tech Prep (Fellow), Girls Who Code (PR Lead), CodePath (Alum), Rewriting the Code (Member)
- ***Relevant coursework*:** Data Structures & Algorithms, Operating Systems, Web Development, Foundations of UX

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, C++
Frontend: React, HTML5, CSS3, GSAP, TailwindCSS
Backend & Cloud: Node.js, Express.js, Flask, PostgreSQL, REST APIs, AWS, GCP
Tools: Git, GitHub, Docker, Linux, Figma, CI/CD Pipelines

WORK EXPERIENCE

Halcyon Finance | **Software Engineer (Contract)** Remote, US | Jun 2025 - Jun 2026

- Designed the lending platform's landing page in Figma and implemented the responsive UI using React, TypeScript, and CSS modules.
- Architected a scalable UI system by building 10+ reusable TypeScript components.
- Engineered multi-frame GSAP animations and applied asset optimization techniques (image compression, lazy loading, etc.) to keep transitions smooth and initial loads fast.

Barclays | **Data Engineering Intern** Whippany, NJ | Dec 2022 - Feb 2023

- Reduced data processing time by 30% by engineering an automated Pandas-based ETL tool in Python, streamlining data pipelines for stakeholders.
- Simplified decision-making by enhancing financial trend analysis and developing dynamic data visualizations.

FELLOWSHIPS & TECHNICAL DEVELOPMENT

CUNY Tech Prep | **Software Engineering Fellow** New York, NY | Jul 2024 - Jul 2025

- Contributed to an open-source SaaS monitor built with React, Node.js, and PostgreSQL; automated attendance tracking via webhooks, reducing manual administrative overhead.
- Operated within a CI/CD environment, utilizing GitHub checks to ensure quality and streamline deployment.

Google | **Software Engineering Fellow** New York, NY | Jul 2023 - Oct 2023

- Solved complex DSA problems in C++ and participated in weekly mock technical interviews and code reviews, improving problem-solving speed, debugging, and technical communication skills.
- Selected as 1 of 80 fellows from 350+ applicants for an intensive 12-week program.

PROJECTS

LinkUp Hackathon Project | Oct 2025

- Deployed a full-stack web application that identifies the fairest meetup spot between friends in New York City.
- Designed and implemented a geospatial algorithm using the Google Maps Distance Matrix API to compute equidistant locations across NYC's five boroughs, ensuring fairness for all users.
- Built a React frontend and Node.js/Express backend, using LangGraph to generate context on recommended venues, with filtering logic (e.g., excluding fast-food chains) handled via hardcoded rules for the demo.

Hands 2 Words Sep 2024 - Dec 2024

- Built an end-to-end web app that translates 9+ American Sign Language gestures into English from live video input in near real-time.
- Engineered the backend and REST API layer, collaborating closely with our machine learning lead to integrate a TensorFlow model into a React frontend for video frame classification.
- Led a team of 5, assigned GitHub issues, configured the dev environment, and managed project milestones.

LEADERSHIP

Digital Girl, Inc. | **Program Administrator & Lead Instructor** Brooklyn, NY | Jan 2018 - Sep 2024

- Managed and trained a team of 30+ staff to deliver technical curriculum, driving a 25% expansion in school partnership sites.
- Authored 20+ adaptable lesson plans to teach programming skills in Python, Digital Literacy, and Web Development.
- Taught 700+ K-12 students and senior citizens, successfully delivering technical concepts to underserved demographics.
